REPORT ON SINGALILA NATIONAL PARK VISIT (SANDAKPHU)

Four teachers (Dr. Kausik Ghosh, Dr. Malay Ghosh, Mr. Hemanta Ghosh and Mr. Subhendu Saha) along with 6 students in 2019 started their journey for Singalila National Park to study flora and faunal diversity. They started from NJP to Dhotrey. From Dhotrey the actual trekking was started. Tumbling was the entry point of Singalila National Park. Kalipokhri was the next destination and final destination was Sandakphu, the highest peak or point of the Singalila ridge of West Bengal, elevation is 3636 m or almost 12000 ft.

Due to bad weather condition (constant rain and snowfall), students were not able to record any faunal diversity. They hardly have seen any bird or butterfly. But a good number of floral diversity was recorded. More than 50 species of Plants were identified. And parts of some plants were taken to the laboratory for maintaining Herbarium sheet for keeping record. The Herbarium sheets are kept in the Department of Botany of the college (B.N.M.V). One checklist of plants was also made by teachers and students.

The tour not only explores floral & faunal diversity, also toughened and prepared the students for any situation in life.

A. Starting the trek

B. At highest point of West Bengal

C. Coming down through snowy path

D. Rhododendron
